ACID/LACTATE (0.64%)

Causes serious eye irritation.

Wash hands thoroughly after handling. Wear protective gloves/protective clothing/eye protection/face protection. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical attention.

For professional use only.

Pre-Guard

DESCRIPTION

- **Formulation contains a special emollient blend**
- **Extremely effective broad spectrum disinfectant**
- **Ready-to-use formulation; does not require dilution in preparation for use**

DIRECTIONS FOR USE

Pre-milking teat preparation:

Recommended for good milk let down, and avoiding contamination of milking system.

1. Ensure teats are free of visible dirt before teat dip application. Wipe clean with individual towels.
2. Apply Pre-Guard to ensure full surface coverage of teat. Prepare a fresh solution daily.
3. Allow a convenient contact time (minimum 1 minute) for effective sanitisation of teats.
4. Dry teats thoroughly using individual paper towels before attaching the milking cluster to prevent iodine residues in milk.

Transport & storage: Transport and store between 4°C - 38°C (40°F - 100°F). Incorrect storage or freezing may cause destabilisation of product.

Shake well before use.
