PERAGUARD

Peracetic Acid liquid is a biocidal industrial cleaner and disinfectant used in circulation cleaning and industrial sanitisation across a diverse range of industries including dairy, recycling & waste management, food & drink manufacture and brewery trade.

Product Advantages

- Highly effective bactericide
- Chlorine free
- · Quenching not required
- Long shelf life
- Minimal pH dependence
- No residue

The contents of this container are guaranteed by the manufacturer to be of the same composition and quality as the sample submitted for approval testing. Read attached instructions before use. Dispose of contents/container in accordance with national regulations. Store below 30°C.

DIRECTIONS FOR USE

Environmental surface disinfection: Add 34ml of Peracetic Acid to 10 litres of water (providing 184 ppm Peracetic Acid). For heavily soiled surfaces remove gross filth and soils with a detergent or suitable cleaning product and then rinse surface with water. Apply the disinfectant, use solution by wiping, mopping or spraying (use course spray device) onto surface to be treated. Let the product soak in on the treated surface for at least 10 minutes and then allow to air dry.

Fogging: Fog areas using 34ml per cubic metre of room area with a solution of 34ml of Peracetic Acid for every 10 litres of water. Let all surfaces drain thoroughly before resuming operations in the treated area.

STORAGE & HANDLING

Store below 30°C. Store in original container. Keep lid firmly attached. Store in a COOL, DARK well ventilated place away from alkalis.
